

TABLE OF CONTENTS

Abstract	i
Table of Contents	ii
List of Figures	v
List of Tables	viii
List of Abbreviations	ix
List of Symbols	x
List of Appendices	xi
Chapter 1	
1. Introduction	1
1.1 Hybrid Electric Vehicle (HEV)	3
1.1.1 HEV Architectures	3
1.1.2 Advantages of HEVs	5
1.1.3 Electric Energy Demand in Vehicles	5
1.2 Waste Heat Recovery	6
1.2.1 Direct Energy Conversion Methods	6
1.3 Thermionic Emission	7
1.3.1 Thermionic Energy Converter (TEC)	8
1.3.2 Low Work Function Materials	9
1.4 Reverse Engineering for Design	9
1.5 Modelling and Simulation	10
Chapter 2	
2. Literature Review	11
2.1 Research Problem	33
2.2 Thesis Contribution	33
2.3 Objectives of the study	33
Chapter 3	
3. Research Methodology	34
3.1 Pre- Research data collection and Calculations	36
3.1.1 Theoretical calculations for heat lost from existing hybrid electric vehicles.	36
3.1.2 Measurement for maximum exhaust gas temperature from a vehicle.	38
Chapter 4	
4. Design & Simulation	41
4.1 Conceptual Design of a small scale Thermionic Regenerator	42
4.2 Reverse Engineering	56

4.2.1	Redesigning - Exhaust System Design Considerations	60
4.2.2	Material considerations for exhaust system	61
4.2.3	Existing Materials	62
4.2.4	Reverser Engineered Full Scale Design	63
4.3	Analytical Study	72
4.3.1	Conceptual Model	72
4.3.2	Analytical Model	73
4.3.3	Efficiency of Thermionic Generator	76
4.4	Design, Modelling and Simulations	84
4.5	Heat Transfer and Thermionic Conversion Analysis	87
4.5.1	Thermionic Conversion Analysis	87
4.5.2	LabVIEW Modules	88
4.5.3	Design Simulation	89
4.6	Thermal Stress and Strain Analysis	90
Chapter 5		
5.	Prototyping	94
5.1	Prototype 3D Printing of a TEC Assembly	94
5.2	Manufacturing and Assembly of TEC (Prototype)	95
Chapter 6		
6.	Experimentation	99
6.1	General Description of MAX6675	100
6.2	Arduino Uno program	101
6.3	Modifications in Test Setup	102
6.4	Material Selection	102
6.5	Assumptions	103
6.6	Experimentation Process	104
6.7	Full Scale modelling and simulation	105
6.8	Developing a Thermionic Regeneration System (TRS) Model	106
6.9	Collaborating IC engine and TRS model	108
6.10	HEV Series Parallel Model	111
6.11	Electrical System Level Modifications	112
6.12	Structure of proposed algorithm	113
6.13	HEV algorithm for waste heat recovery using thermionic regeneration	114
6.14	Implementation of TRS control algorithm in Model Logic under Control system	115
6.15	Drive Cycles	115
6.16	TRS integrated HEV model	116

Chapter 7

7. Results and discussion	118
7.1 Analytical Study	118
7.1.1 Discussion on results of analytical study	119
7.2 MATLAB simulation	128
7.3 Fuel Consumption without TRS	128
7.4 Fuel Consumption with TRS	129
7.5 TRS Power Output	130
7.6 Validation	131
7.7 Limitation	131

Chapter 8

8. Conclusions and Future Work	132
8.1 Conclusions	132
8.2 Future Work	132
References	133
