

## LIST OF FIGURES

### Chapter 1

#### Introduction

Fig. 1.1 Country-wise CO <sub>2</sub> Emissions	1
---	---

### Chapter 3

#### Research Methodology

Fig. 3.1 Research Methodology	35
Fig. 3.2 Setup showing connection of BOSCH KTS 590 with vehicle OBD	38
Fig. 3.3 Desktop window for showing ESI (tronic) dashboard	38

### Chapter 4

#### Design and Simulation

Fig. 4.1. Exploded View of a designed Thermionic Regenerator	44
Fig. 4.2. Bottom Fixture	49
Fig. 4.3. Bottom Guide	50
Fig. 4.4. Emitter	51
Fig. 4.5. Collector	52
Fig. 4.6. Top Guide	53
Fig. 4.7. Top Fixture	54
Fig. 4.8. Insulator	55
Fig. 4.9. Obtained CAD Design from CMM	56
Fig. 4.10. Exhaust pipe taken for measurement	57
Fig. 4.11. Measurements on CMM	58
Fig. 4.12. CAD Drawing Obtained from CMM	58
Fig. 4.13. Design of a Thermionic Regeneration System	64
Fig. 4.14. Collector Pipe	65
Fig. 4.15. Emitter Pipe	66
Fig. 4.16. Flange	67
Fig. 4.17. Insulator	68
Fig. 4.18. Guide	69
Fig. 4.19. Assembly	70
Fig. 4.20. Assembly Exploded	71
Fig. 4.21. Thermionic Regeneration System	73
Fig. 4.22. Front Panel	81
Fig. 4.23. Block Diagram	82
Fig. 4.24. Input Heat Equations on Block Diagram	83

Fig. 4.25. Thermionic Emission Equation on Block Diagram	83
Fig. 4.26. Output and Efficiency Equation on Block Diagram	84
Fig. 4.27. COMSOL Work Window	85
Fig. 4.28. Model Builder	85
Fig. 4.29. Settings	86
Fig. 4.30. Graphics	87
Fig. 4.31. Heat Transfer Analysis on LabVIEW	88
Fig. 4.32. Thermionic Conversion Analysis on LabVIEW	89
Fig. 4.33. Geometry Import	89
Fig. 4.34. Particle Trajectories	89
Fig. 4.35. Electric Potential	89
Fig. 4.36. Thermal Stress and Strain Equation	92
Fig. 4.37. 2D Axisymmetric Geometry	93
Fig. 4.38. Thermal stress strain analysis	93
Fig. 4.39. 3D thermal stress strain analysis	93

## **Chapter 5**

### **Prototyping**

Fig. 5.1. 3D Printed Prototype	94
Fig. 5.2. Turning	95
Fig. 5.3. Tapping	96
Fig. 5.4. Drilling	96
Fig. 5.5. Assembly 1	97
Fig. 5.6. Assembly 2	97

## **Chapter 6**

### **Experimentation**

Fig. 6.1. Test Setup Block Diagram	99
Fig. 6.2. Experimental Test Setup Image	100
Fig. 6.3. Design of clamp	102
Fig. 6.4. Test setup assembly with clamp	102
Fig. 6.5. Experimentation Process	104
Fig. 6.6. Steps for Performing Full Vehicle Simulation with TRS on MATLAB Simulink	105
Fig. 6.7. Simulink Models and their Collaboration (block diagram)	106
Fig. 6.8. Thermionic Regeneration System (TRS) Model	107
Fig. 6.9. IC Engine with Throttle and Rotational Inertia and Time lag	108
Fig. 6.10. SI and CI Core Engine	109

Fig. 6.11. Existing Model	111
Fig. 6.12. Electrical System	112
Fig. 6.13. Entire Structure of the Optimal Control Algorithm for TRS HEV	113
Fig. 6.14. TRS Control Algorithm	114
Fig. 6.15. TRS Control Algorithm implemented MATLAB Stateflow	115
Fig. 6.16. Urban Drive Cycle 1	115
Fig. 6.17. Urban Drive Cycle 2	116
Fig. 6.18. Urban Drive Cycle 3	116
Fig. 6.19. TRS integrated HEV model	117

## **Chapter 7**

### **Results and Discussion**

Fig. 7.1. Effect of Temperature on Potential Difference between Emitter and Collector (Without Coating)	118
Fig. 7.2. Effect of Temperature on Potential Difference between Emitter and Collector (With Coating)	119
Fig. 7.3. Electric Potential between Emitter and Collector	120
Fig. 7.4. Particle Trajectories Showing Thermionic Emission	121
Fig. 7.5. Electric Potential in Emitter to Collector Region	121
Fig. 7.6. Graph of Power output and Efficiencies	122
Fig. 7.7. Results for Aluminum as Emitter and Molybdenum as a Collector	123
Fig. 7.8. Results for Brass as emitter and Molybdenum as a collector	123
Fig. 7.9. Results for Mild Steel as emitter and Molybdenum as a collector	124
Fig. 7.10. Heat Transfer Analysis	125
Fig. 7.11. Thermionic Emission Analysis	125
Fig. 7.12. Thermal Stress Analysis	126
Fig. 7.13. Thermal Strain Analysis	126
Fig. 7.14. Experimentation Result	127
Fig. 7.15. Engine Power	128
Fig. 7.16. Fuel Consumption without TRS	128
Fig. 7.17. Fuel Consumption with TRS	129
Fig. 7.18. TRS Output power	130

## LIST OF TABLES

### Chapter 1

#### Introduction

Table 1.1: Energy Demand	5
--------------------------	---

### Chapter 3

#### Research Methodology

Table 3.1: Heat Balance Sheet Equations	36
---	----

Table 3.2: Heat Balance Sheet Calculations	37
--	----

Table 3.3: Obtained Data from Volkswagen polo	40
---	----

### Chapter 4

#### Design

Table 4.1: Assembly Design Part Description	45
---	----

Table 4.2: CMM CAD Data	59
-------------------------	----

Table 4.3: Materials Considered for Analysis	62
--	----

Table 4.4. Thermal, Mechanical and Thermionic Emission Related Properties	63
---	----

### Chapter 6

#### Experimentation

Table 6.1: High Work Function Materials	103
---	-----

Table 6.2: Low Work Function Coating Materials	103
--	-----

Table 6.3: Variables for IC engine model	111
--	-----
